Using your Bins

BIN PLACEMENT

To assist waste and recycling operators in servicing your bin on collection day:

- Bins should be placed within 1 metre of the road kerb by 6.00am on collection day, with the handles facing towards the property, without the bin blocking footpaths or driveways.
- Place your yellow recycling bin about half a metre from the green bin to allow clear access for the side loading service vehicle's grab arm.
- Please do not overfill your bin as the rubbish and recycling trucks' hydraulics cannot lift bins weighing over 70kg, or those overfull with the lid open. Hot or burning ash, liquid wastes, oil, paint, solvents or heavy materials should not be placed in your bin as they may damage the bin, waste collection vehicle and the environment.
- Your bin lid must close so that the contents do not spill when it is lifted and so the lid does not blow open causing street litter.
- Place your bin clear of parked cars, trees, poles, etc to allow clear access to the service vehicles.
- Only waste placed inside the bin will be collected.

HANDY HINTS

- Return bins to your property as soon as possible.
- Store bins in a shaded area.
- Clean bins regularly.

For information on what to put in your recycle bin visit recycleright.wa.gov.au
